

# "CERAMANT" Vitreous China

IMPROVED BODY + SUPERB FINISH  
NEW DESIGNS

TWYFORDS LIMITED + STOKE-ON-TRENT  
*Copyright June 1950      Printed in England      Folder No. 626*

WE HAVE RESUMED MANUFACTURE of "Ceramant" Vitreous China, the production of which was temporarily suspended during the war. All the improvements made possible by technical progress are incorporated in this new product which we are confident will give every satisfaction.

THIS FOLDER ILLUSTRATES the first two patterns, a new design Lavatory and Toilet Basin. Other patterns are in course of preparation and will be advised as they become available.

**"CERAMANT" VITREOUS CHINA** is a pure white ware of very fine texture and finish

**"CERAMANT" WARE IS CONSISTENTLY VITREOUS** i.e. non-porous throughout the clay body and glaze.

**THE PURITY OF COLOUR AND SPARKLING WHITE FINISH** should satisfy the most exacting demands regarding quality.

**THE PATTERNS ARE DESIGNED IN A SIMPLE BUT DISTINCTIVE STYLE** which is attractive~ and a change from the usual cut-corner fashion.
